1) The **War on Drugs** is a campaign of prohibition and foreign military aid and military intervention being undertaken by the United States government, with the assistance of participating countries, intended to both define and reduce the illegal drug trade. 2) This initiative includes a set of drug policies of the United States that are intended to discourage the production, distribution, and consumption of illegal psychoactive drugs. 3) The term "War on Drugs" was first used by President Richard Nixon in 1971.

4) On May 13, 2009, Gil Kerlikowske, the current Director of the Office of National Drug Control Policy (ONDCP), signaled that although it did not plan to significantly alter drug enforcement policy, the Obama administration would not use the term "War on Drugs," as he claims it is "counter-productive". 5) ONDCP's view is that "drug addiction is a disease that can be successfully prevented and treated... making drugs more available will make it harder to keep our communities healthy and safe."(2011)

6) One of the alternatives that Mr Kerlikowske has showcased is Sweden's Drug Control Policies that combine balanced public health approach and opposition to drug legalization. 7) The prevalence rates for cocaine use in Sweden are barely one-fifth of European neighbors such as the United Kingdom and Spain.

8) In June 2011 the self-appointed Global Commission on Drug Policy released a critical report on the War on Drugs, declaring "The global war on drugs has failed, with devastating consequences for individuals and societies around the world. 9) Fifty years after

the initiation of the UN Single Convention on Narcotic Drugs, and years after President Nixon launched the US government's war on drugs, fundamental reforms in national and global drug control policies are urgently needed." 10) The report was immediately criticized by organizations that oppose a general legalization of drugs. **I. Переведите текст на русский язык.**

1) **Smuggling** has a long and controversial history, probably dating back to the first time at which duties were imposed in any form, or any attempt was made to prohibit a form of traffic.

2) In England smuggling first became a recognized problem in the 13th century, following the creation of a national customs collection system by Edward I in 1275. 3) Medieval smuggling tended to focus on the export of highly taxed export goods — notably wool and hides. 4) Merchants also, however, sometimes smuggled other goods to circumvent prohibitions or embargoes on particular trades. 5) Grain, for instance, was usually prohibited from export, unless prices were low, because of fears that grain exports would raise the price of food in England and thus cause food shortages and / or civil unrest. 6) Following the loss of Gascony to the French in 1453, imports of wine were also sometimes embargoed during wars to try to deprive the French of the revenues that could be earned from their main export. 7) One study of smuggling in Bristol in the mid-16th century, based on the records of merchant-smugglers, has shown that the illicit export of goods like grain and leather represented a significant part of the city's business, with many members of

the civic elite engaging in it. 8) Grain smuggling by members of the civic elite, often working closely with corrupt customs officers, has also been shown to have been prevalent in East Anglia during the later 16th century. 9) In England wool continued to be smuggled to the continent in the 17th century, under the pressure of high excise taxes. 10) In 1724 Daniel Defoe wrote of Lymington, Hampshire, on the south coast of England

"I do not find they have any foreign commerce, except it be what we call smuggling and roguing; which I may say, is the reigning commerce of all this part of the English coast, from the mouth of the Thames to the Land's End in Cornwall."

#### **Economics of smuggling**

1) Research on smuggling as economic phenomenon is scanty. 2) Jagdish Bhagwati and Bent Hansen first forwarded a theory of smuggling in which they saw smuggling essentially as an import-substituting economic activity. 3) Their main consideration, however, was the welfare implications of smuggling. 4) Against common belief that the private sector is more efficient than the public sector, they showed that, smuggling might not enhance social welfare though it may divert resources from government to private sector. 5) In contrast, Faizul Latif Chowdhury, in 1999, suggested a production-substituting model of smuggling in which price disparity due to cost of supply is critically important as an incentive for smuggling. 6) This price disparity is caused by domestic consumption taxes as well as import duties. Drawing attention to the case of cigarettes, Chowdhury suggested that,

in Bangladesh, smuggling of cigarettes reduced the level of domestic production. 7) Domestic production of cigarettes is subject to value added tax (VAT) and other consumption tax. Reduction of domestic taxes enables the local producer to supply at a lower cost and bring down the price disparity that encourages smuggling.

8) However, Chowdhury suggested that there is a limit beyond which reducing domestic taxes on production cannot confer a competitive advantage versus smuggled cigarettes. 9) Therefore, government needs to upscale its anti-smuggling drive so that seizures (the taking possession of person or property by legal process) can add to the cost of smuggling and thus render smuggling uncompetitive. 10) Notably, Chowdhury modelled the relationship of the smuggler to the local producer as one of antagonistic duopoly.

1) Counterfeiting is probably as old as money itself. 2) Before the introduction of paper money, the most prevalent method of counterfeiting involved mixing base metals with pure gold or silver. 3) A form of counterfeiting is the production of documents by legitimate printers in response to fraudulent instructions. 4) During World War II, the Nazis forged British pounds and American dollars. 5) Today some of the finest counterfeit banknotes are called Superdollars because of their high quality, and likeness to the real US dollar. 6) There has been a considerable amount of counterfeiting of Euro banknotes and coins since the launch of the currency in 2002.

7) Some of the ill-effects that counterfeit money has on society are: a reduction in the value of *real* money; and increase in prices (inflation) due to more money getting circulated in the economy - an unauthorized artificial increase in the money supply; a decrease in the acceptability of paper money; and losses, when traders are not reimbursed for counterfeit money detected by banks, even if it is confiscated.

8) Traditionally, anti-counterfeiting measures involved including fine detail with raised intaglio printing on bills which allows non-experts to easily spot forgeries. 9) On coins, *milled* or *reeded* (marked with parallel grooves) edges are used to show that none of the valuable metal has been scraped off.

10) When paper money was introduced in China in the 1200s, wood from mulberry trees was used to make the money.
